
JsonSchema Documentation

Release 1.0.0

Justin Rainbow, Bruno Prieto Reis

January 10, 2017

1	Installation	3
1.1	Composer method	3
2	Usage	5
3	Indices and tables	7

Contents:

Installation

```
git clone https://github.com/justinrainbow/json-schema.git
```

1.1 Composer method

Add the *justinrainbow/json-schema* package to your *composer.json* file.

```
{
    "require": {
        "justinrainbow/json-schema": "1.1.*"
    }
}
```

Then just run the usual *php composer.phar install* to install.

Usage

```
<?php
$validator = new JsonSchema\Validator();
$result = $validator->validate(json_decode($json), json_decode($schema));

if ($result->valid) {
    echo "The supplied JSON validates against the schema.\n";
} else {
    echo "JSON does not validate. Violations:\n";
    foreach ($result->errors as $error) {
        echo "[{$error['property']}] {$error['message']}\n";
    }
}
```

Indices and tables

- `genindex`
- `modindex`
- `search`
